

RECIPROCATING COMPRESSOR

# L-Series

### The L-series

is well suited for the WB capacity range and is able to be direct coupled to a 4 pole motor (maximum 1750 rpm with NH<sub>3</sub>) to create a small, light weight, high speed unit. Either HFCs or NH<sub>3</sub> refrigerant can be used in the L-series. The compressor has been designed by our best engineers using all MAYEKAWA's know how. For instance, the unloader oil pressure piping including lubricating oil line are well built into the machine body, eliminating the need for external piping which makes the L-series compact resulting in less maintenance space and service friendly.
