

RECIPROCATING COMPRESSOR

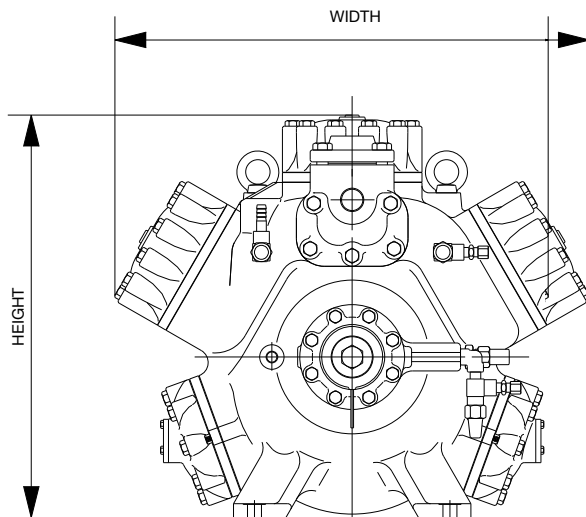

# HK-Series

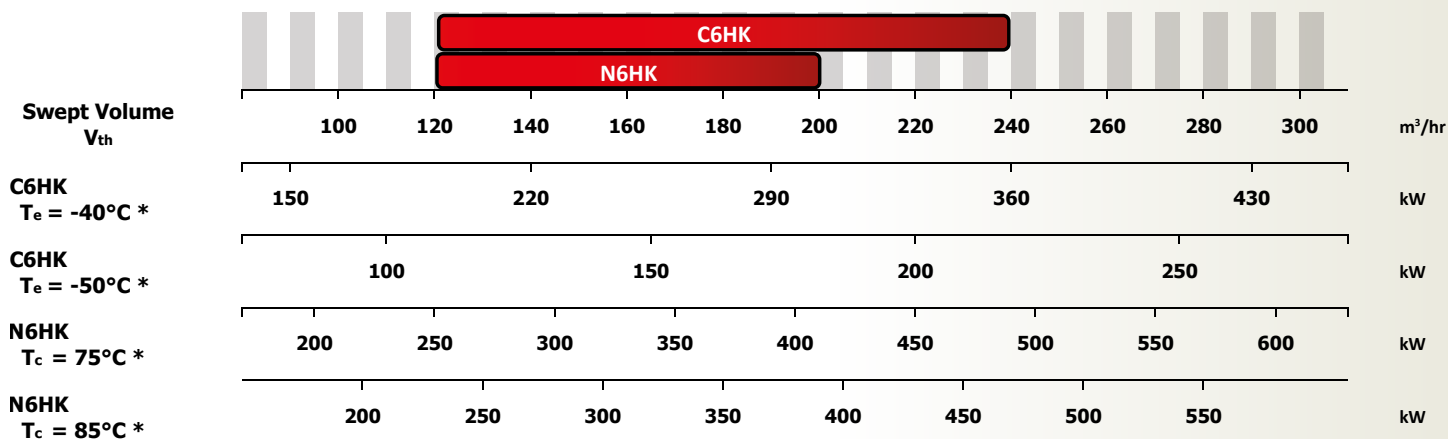

### The HK-series

stands for high pressure. The machine can be used to compress the gas up to 50 bar. Today every customer wants to reduce his energy consumption. HK-series compressors are used in CO2 refrigeration systems and in NH3 heat pumps. When using the HK-series compressor in CO2 refrigeration, it is not necessary to foresee a separate defrosting compressor, as the basic refrigeration compressor can also be used in defrosting mode.

HK-series compressor heat pumps are directly contributing to important energy savings. The heat pump can produce hot water over 80 °C with significant reduction of fossil fuels such as gas and oil. HK-series compressors can be used in a wide range of pressures and speeds. HK-series compressors will directly contribute in achieving your plant energy reduction plan.
